## ***General Summary***

I am a self-motivated, diligent, joyful, and kind person who has developed a variety of relevant skills and personal attributes through staffing, development, system administration and playing minecraft for over 3 years. I have strong management skills from working with multiple networks and services. I have a decent understanding of general employability skills, and I know the importance of teamwork and learning from coworkers. I have 5 years of experience of working on Linux. My preferred Operating System for working on System Administration is the Debian Linux family. I have 1-3 year

of Javascript experience. My preferred library is NodeJS or ExpressJS. I also have a decent knowledge of Java but not enough to write code in Java. I am also trying to get certified in Ethical Hacking and Penetration Testing. For the Ethical Hacking and Penetration Testing field I would personally say I have a piece of somewhat good knowledge about red vs blue situations and I have done multiple KoTHs and CTFs in the hacking field.

## *Personal Skills*

- Customer Support
- Dispute Resolution
- Leadership
- Staff Management
- Community Management
- System Administration
- Frontend & Backend Development
- Penetration Testing
- Ethical Hacking

## *Education*

- Helping with advertisements
- Helping customers that need support
- Securing the backend and license system for SolexGames

## Misq Development | Developer -> Founder

- Helping with applications and support tickets
- Developing plugins and contributing code
- Managing the License system

## *Personal Attributes*

- **Communication Skills** || I know as being employed at a network I must have communication skills to be able to work with others.
- **Compassion** || I know that compassion is a great trait to have in leadership because it helps set a good example for others and can help show others that they don't have to be afraid of you. That way they can confront you about stuff.
- **Willingness to learn** || I am always willing to learn from others to get a better experience and I am always open up to other suggestions.
- **Adaptability** || I can adapt to a new change very easily in most situations. And I know in work environments things can always change at the last second.
- **Resilience** || I know in life that not everything will always go to plan and that most stuff doesn't go smoothly in life and I am fully aware of this. And I love facing obstacles because I feel as if they can help me improve in the future by getting past them.

## *Some of my Projects*

- [Cesium](#) A discord.js library bot coded in JavaScript that uses vultrex for managing levels and giveaways. This bot was a project I started in SolexGames but decided to open source it later on.
- [PhantomShell](#) - A modified version of the Bash interpreter, made up of Bash scripts, modified versions of scripts and extensions, and .d files used with Linux services. Bash hasn't been modified at all, just

packages and services related to Bash. Forked off of Artemis Shell  
from Dannington

- [Website](https://bunni.me/) - The src for <https://bunni.me/> the website is coded in React and has an API that fetches the users discord status and spotify song.

## *Testimonials // Vouches // References <3*

ItzBunni (Emily) She is just an intelligent person for what she does, She will help with anything that she can manage, When I owned Envo she gave the most time she could give and always was there to help with the server & just in general. Emily is a very productive person, Her skills are impeccable. She is well known when it comes to her System administration She is also a wholesome person and said again a very productive person." - Bawaan#0459 // 254718997583495169

"Emily is a very hard working individual. She is always willing to assist you and give you helpful advice when needed. Her most notable attributes are being honest and productive at all times. Emily is currently employed at my server and always sets time aside to help and assist the server. She replies instantly whenever I message her about a concern and double checks all her security measures. Emily is someone you want and need on your server because of her knowledge and productivity. I give Emily a huge vouch and thumbs up!" - ThatsWhack#0823 // 395789005633093643

"Emily was very attentive to Aura and helped in whatever way she could whether it would benefit her or not. She has a good mindset with using her knowledge on system administration to help others secure their dedicated servers/VPS. I give Emily a huge vouch because she's hard-working and a very notable system administrator" - LBuddyBoy#6163 // 286976169172008960

"Vouch for Emily (869311033351749632)- has done a great job in assisting me when it comes to maintaining backend services at Scala & our operated networks.

(PvPBar, Verio)"

growly#4953 // 559497100296060939

"I am the Owner & Founder of the Esta Network, and my server has went through many ups and downs, and whilst during one of the downs, Emily went out of her way to help us get back on our feet, I am more than thankful and grateful that she did this for us, Emily is a knowledgeable person and an incredible system administrator, as well as always reliable in every situation that we've encountered. I would highly recommend Emily to anybody who is in need of a system administrator, website developer, and or discord bot developer." -

hydro#8425 // 181944866987704320 (CEO of HydraBank)

Tom.#7945 // 683781987726917663 (CEO of Volteric)

"Emily is one of the best system admins that I ever came into contact with. I have personally owned and staffed on projects that used her as a system admin and not once was there any issues with the service and the system was entirely secure. Emily has mastered the system administration space and is very good at what she does. Definitely recommend." - 98ping#3040 / 421443176838987786
